

## Documentation modification of the Kicad project

From KiCad open the .pro

Load libraries in the project

Modification of the wiring diagram:

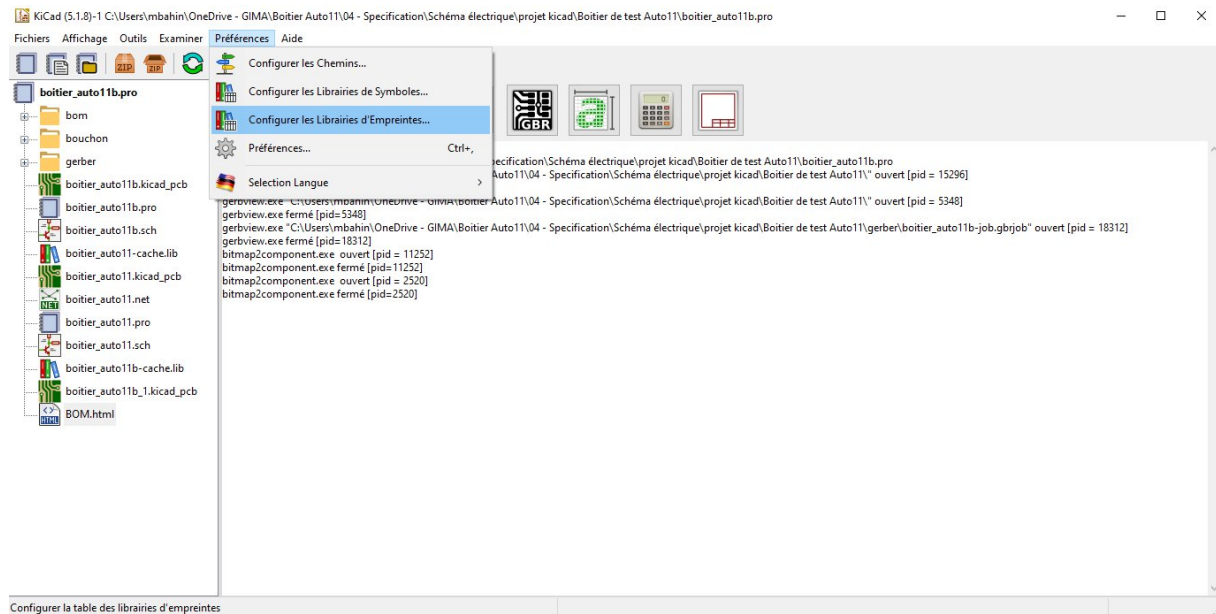

In preferences / Configure symbols path / Global libraries :

- Click on  then select the used libraries

## Modification routing :

In preferences / Configure symbols path / Global libraries :

- Click on  then select the used footprints

If the libraries are not loaded, some components appear as a box with ? inside (in electronic schematic editing mode).
